

Why you should choose our project?

- (1) Because the project basically based on Object-oriented programming (OOP)
- (2) Because the project basically based on 3 (package)
 - [1] The first one contains the tables model
 - [2] The second one contains the GUI classes
 - [3] The third one contains the classes the is the bridge between the database and the GUI
- (3) We have GUI for the employee that let him book rooms and GUI for the admin that let him do that too and add or delete employees

The team roles:

- (1) **Bahaa zenhom** is responsible for the designing, creating and implementing the desktop application
- (2) **Waleed abdelmaged el a3ser** is responsible for creating the documentation
- (3) **Youssef gamal** is responsible for creating the database
